Req3 shared plots for comparison

Branch: feature/req3-primal-dual
Shared input folder: results/processed/req4_shared_realizations

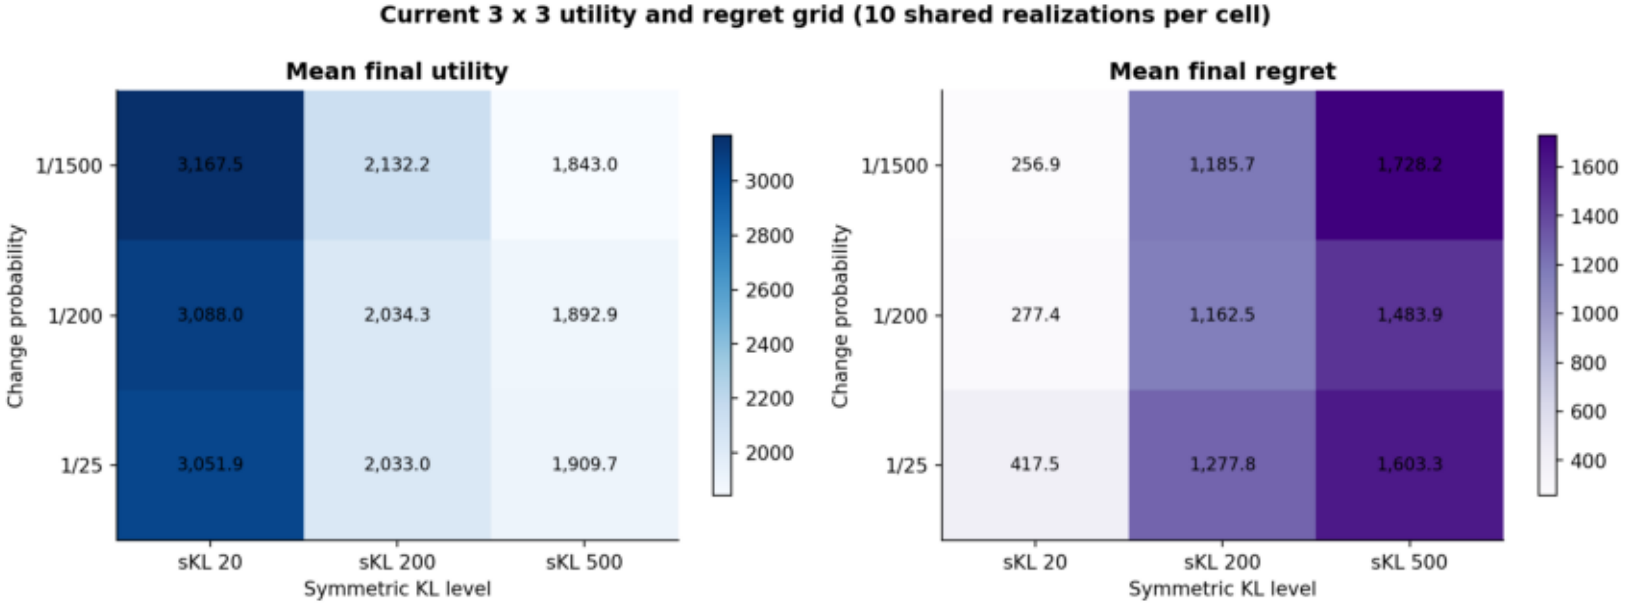

Settings: N=5, B=2500, sKL={20, 200, 500}, p={1/1500, 1/200, 1/25}
Low-frequency schedule: 2 change points at rounds 802 and 1988, minimum gap 802 rounds.
Medium-frequency schedule: 12 change points with seed 2044, minimum gap 97 rounds.
High-frequency schedule: 131 change points with seed 22000.

Conflict graph: 5-cycle; feasible super-arms are 5 singletons + 5 non-adjacent pairs.
Generated from slides/generated_current.

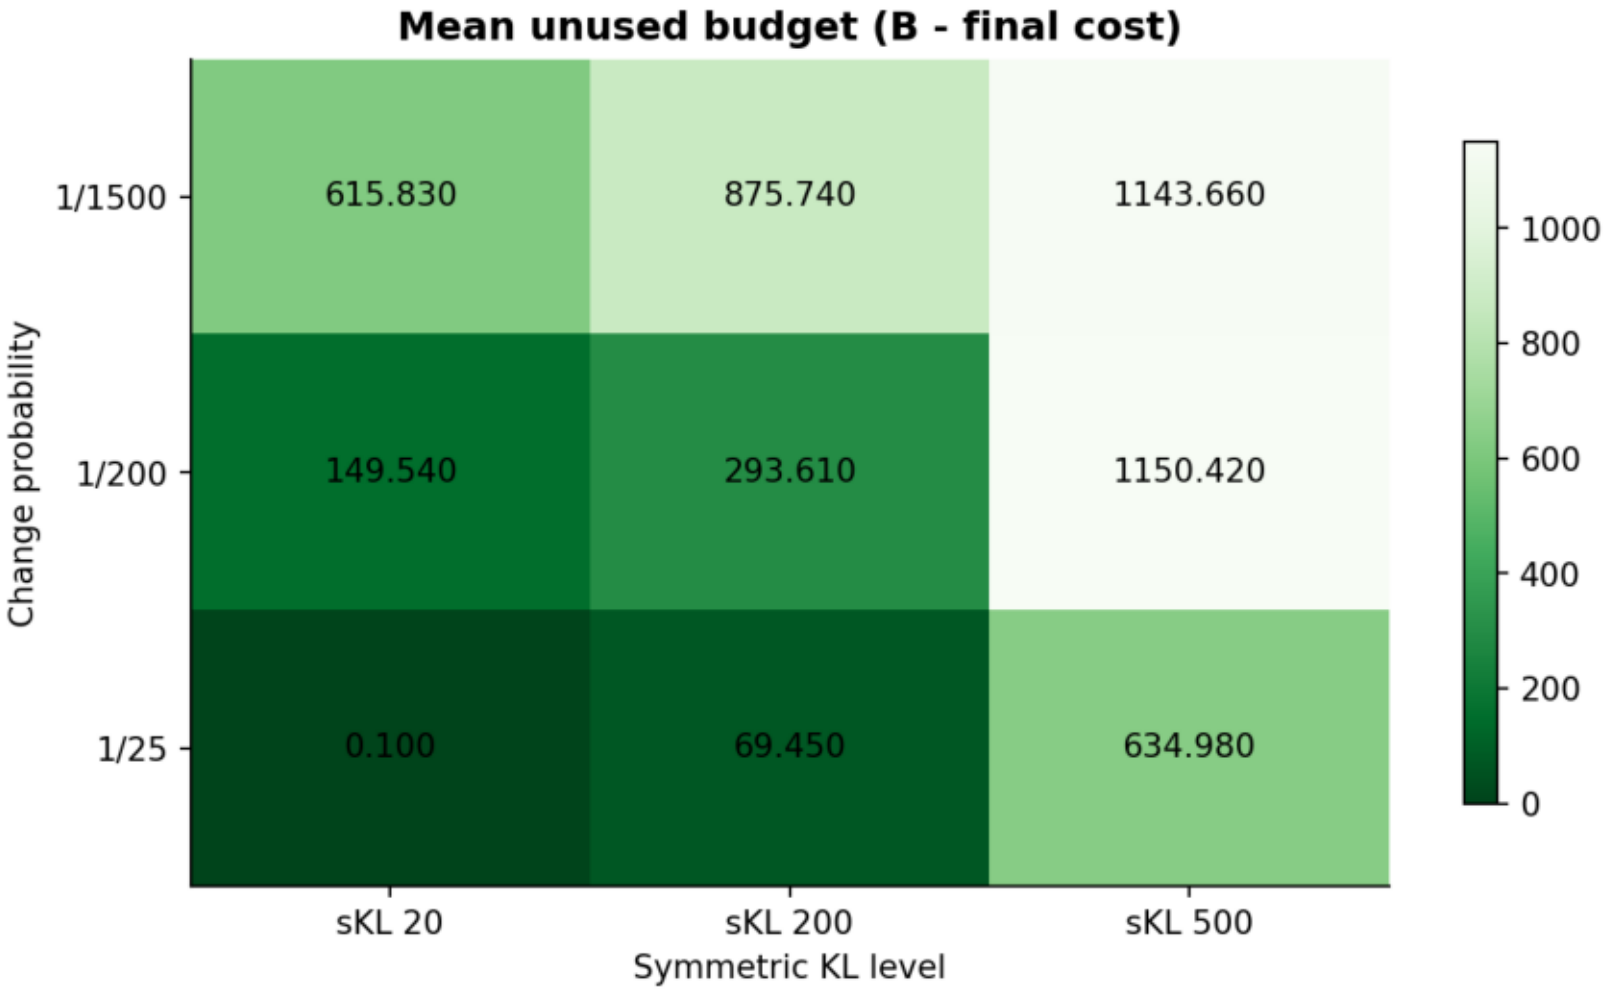

Learning curves over all settings

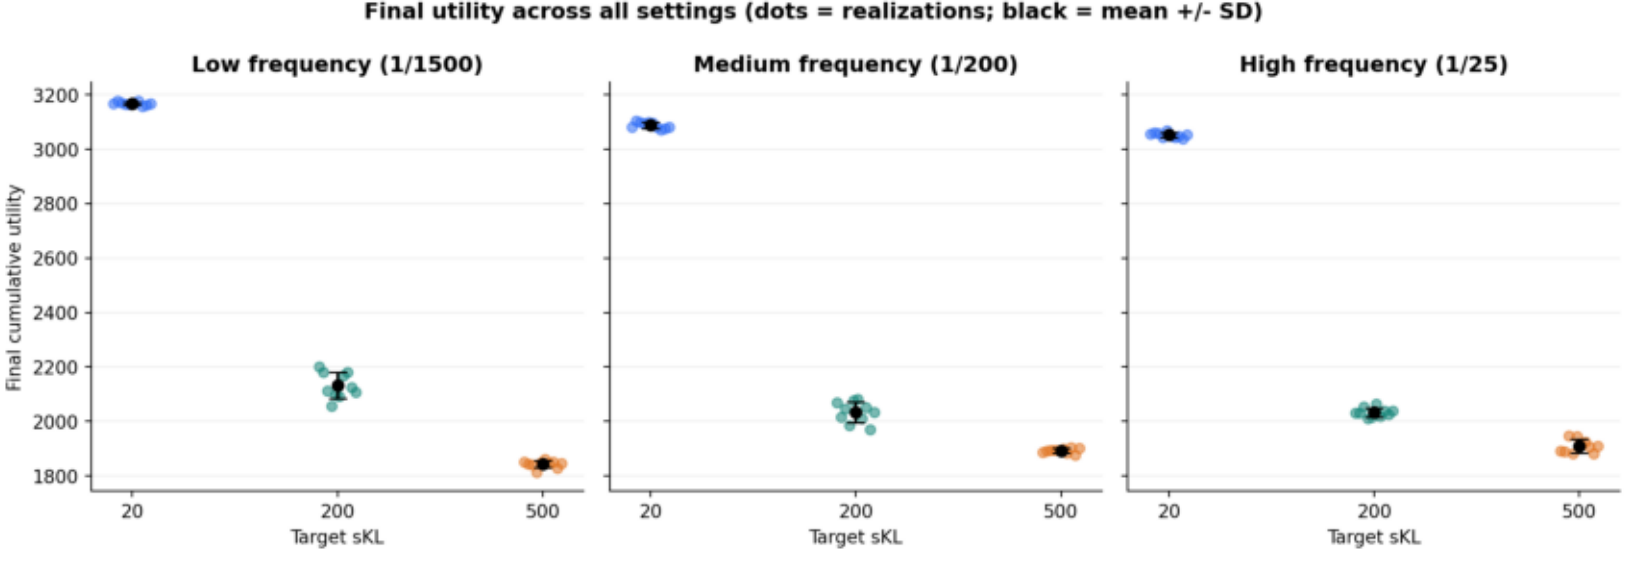

Utility, regret, and budget sensitivity grids

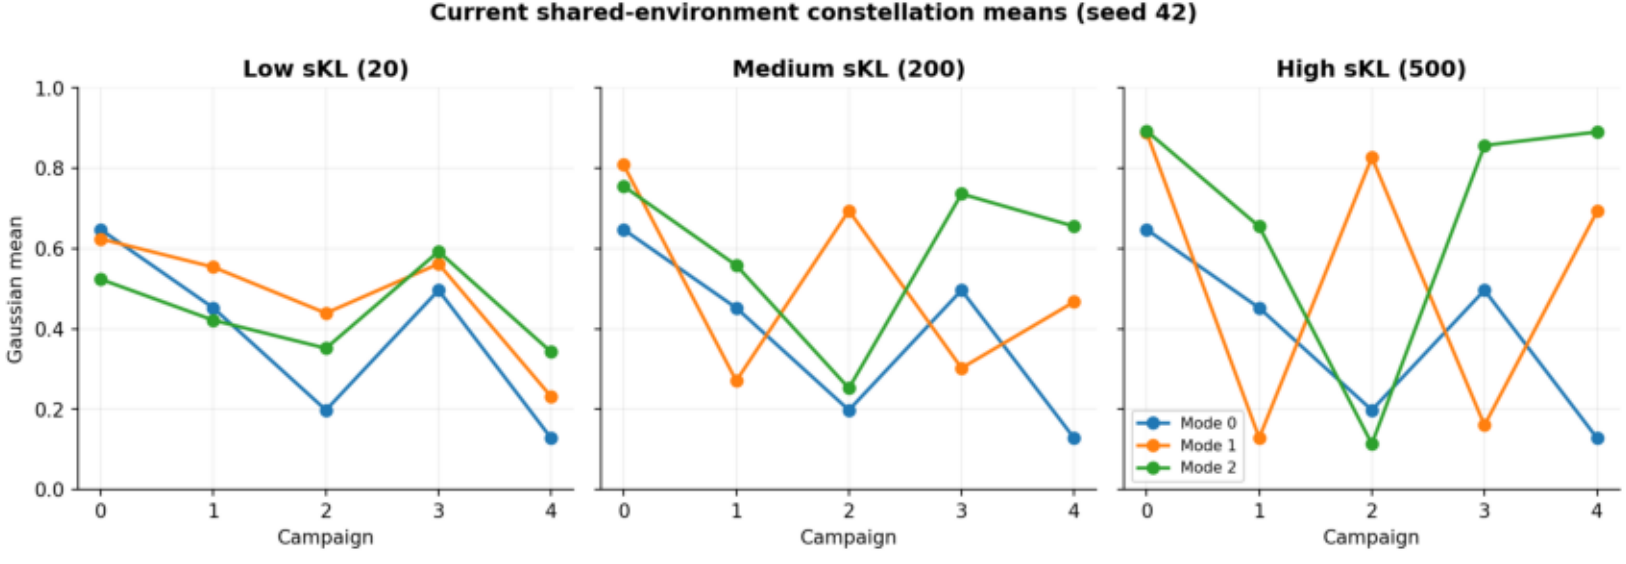

Budget feasibility across settings

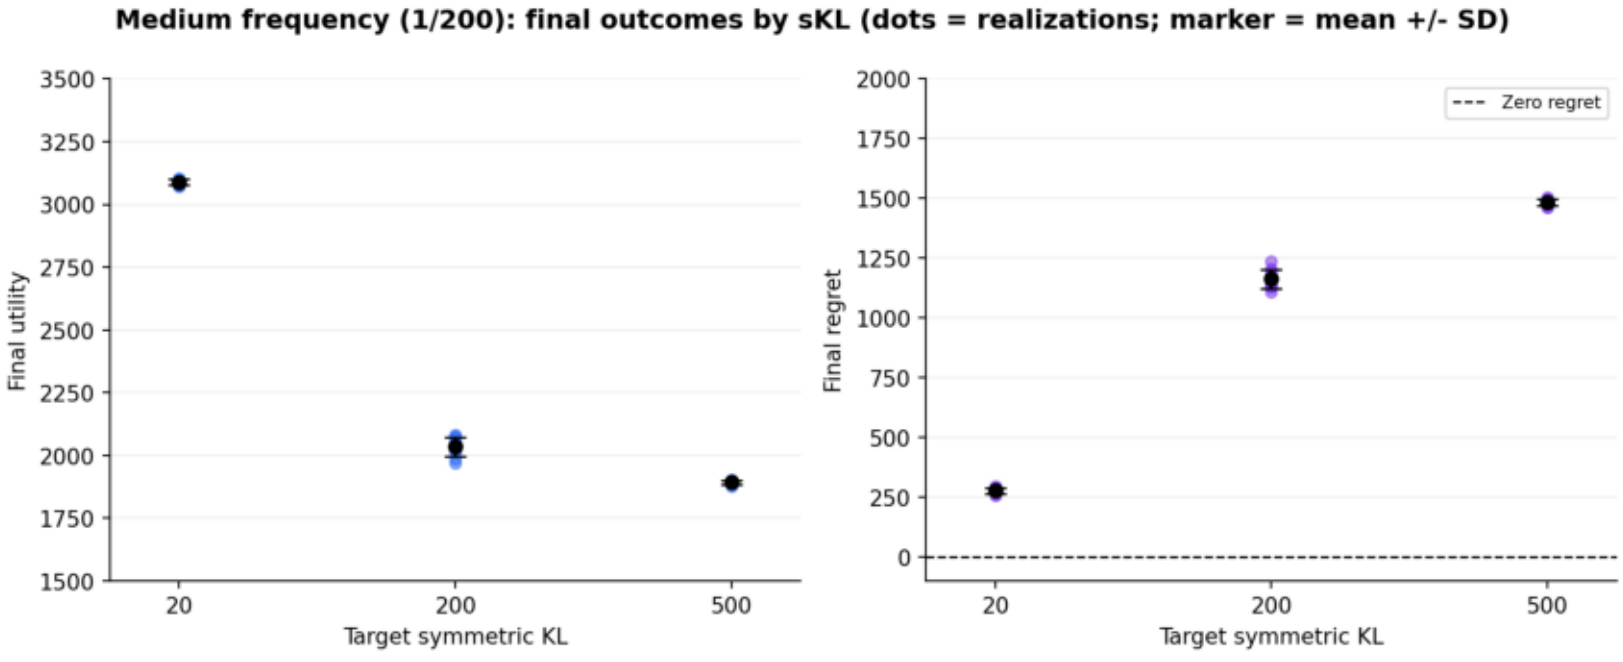

Final utility distributions

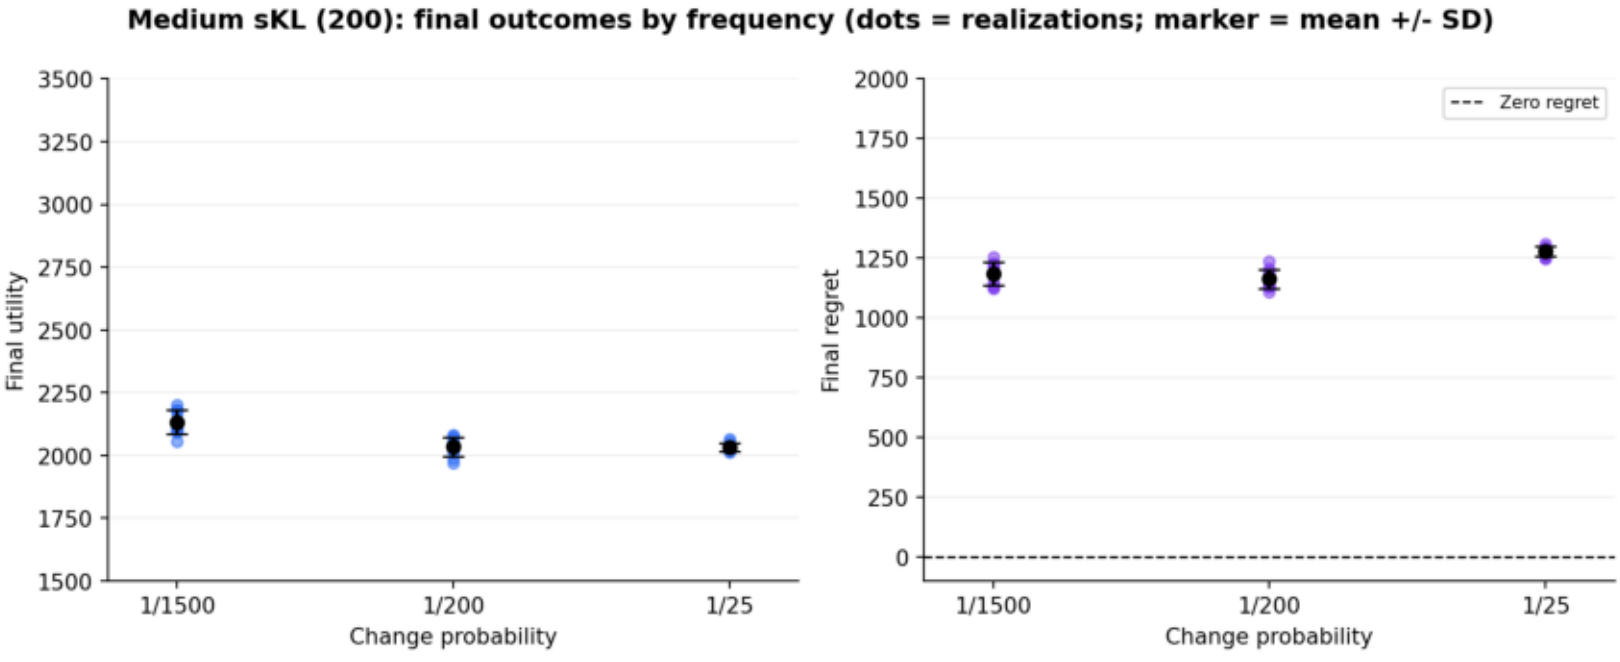

Gaussian constellation profiles
